# Contents

<b>Chapter 1</b>	
<b>Introduction</b>	1
Management for Storage .....	3
Critical Control Points.....	3
Variables Related to Intensity of Management .....	3
Need for Partnerships.....	6
<b>Chapter 2</b>	
<b>Odors</b> .....	9
Introduction.....	9
What is Odor?.....	9
Primary Biosolids Odorants .....	10
Odor Management: A Partnership Effort.....	10
Factors Affecting Ultimate Odor Potential at Critical Control Point 1: WWTPs .....	12
Stability .....	12
Other Odor Prevention Considerations.....	14
Factors Affecting Ultimate Odor Potential at Critical Control Point 2: The Transportation Process.....	15
Factors Affecting Ultimate Odor Potential at Critical Control Point 3: The Field Storage Site.....	15
Meteorological Conditions .....	16
Planning and Monitoring.....	17
Length of Storage and Changes in Biosolids Characteristics .....	18
Accumulated Water and Site Management .....	18
References .....	19
<b>Chapter 3</b>	
<b>Water Quality</b> .....	21
Introduction.....	21
Water Quality Issues.....	21
Nutrients, Organic Matter, and Impacts on Surface Water.....	22
Nutrients and Groundwater .....	23
Pathogens.....	23
Metals and Synthetic Organic Chemicals .....	23
Management Approaches.....	25
Keep Clean Water Clean.....	25

---

Manage Water that comes into Contact with Biosolids .....	25
Preventing Leaching .....	26
Managing Accumulated Precipitation (See also Chapter 5).....	26
Prevent Movement of Biosolids.....	26
Design and Management Approaches for Water Quality Protection .....	27
References .....	29

## **Chapter 4**

<b>Pathogens.....</b>	31
Introduction.....	31
Biosolids Products Characteristics.....	31
Biosolids Storage Considerations .....	32
Pathogens in Stored Class A Biosolids .....	32
Pathogens in Stored Class B Biosolids .....	34
Accumulated Water.....	34
When is Retesting Required?.....	35
Storage Site Management.....	37
Worker Safety .....	37
References .....	38

## **Chapter 5**

<b>Recommended Management Practices .....</b>	41
Introduction.....	41
I. Site Selection Considerations Applicable to all Storage .....	44
Climate.....	42
Topography.....	42
Soils and Geology .....	42
Buffers .....	43
Odor Minimization and Aesthetics .....	43
Accessibility and Hauling Distance.....	43
Property Issues .....	44
II. Field Storage: Stockpiles .....	44
Design Considerations .....	45
Site Selection and Water Management .....	45
Operational Practices.....	46
Housekeeping .....	47
Security .....	48
Site Restoration .....	48
III. Field Storage: Constructed Facilities.....	51
Introduction .....	51
Design Considerations .....	51
More on Water Management.....	56
Effects of Storage: Application Rate Adjustments.....	57
Operational Practices for Constructed Facilities .....	57
Housekeeping and Aesthetics .....	58
Security .....	61
IV. Odor Prevention and Mitigation .....	61
Prevention.....	61
Mitigation .....	62
V. Spill Prevention and Response.....	63
Prevention.....	63
Spill Response .....	64

---

Reporting .....	64
References .....	64
Example Biosolids Fact Sheet .....	65
Example Spill Response Procedure.....	67
References .....	69
<b>Chapter 6</b>	
<b>Introduction .....</b>	<b>71</b>
Audience Assessment .....	73
Program Evaluation .....	72
<b>Chapter 7</b>	
<b>Biosolids-Derived By-Products (Blends) and Other Organic Materials.....</b>	<b>77</b>
Introduction.....	77
Storage Considerations .....	78
Physical Consistency and Water Content.....	78
Biological Consistency .....	79
Pathogen Potential.....	79
Odor Characteristics .....	79
Vector Attraction .....	80
Nutrient and BOD Content .....	80
Fats and Oils.....	80
Dust Potential.....	80
Combustibility.....	81
Consistency/Predictability of Product Over Time.....	81
Regulatory Considerations .....	81
References .....	82
<b>Appendix A</b>	
<b>Odor Characterization and Odor Sampling .....</b>	<b>83</b>
Odor Characteristics .....	83
Sensory Characterization .....	83
Odor Assessment .....	84
Field Practice Options.....	84
Physical-Chemical .....	83
Odor Determination .....	89
Odor Sample Collection .....	89
Sample Analysis .....	90
Sensory Odor Analysis.....	90
Chemical Analyzers and Instruments .....	91
References .....	92
<b>Appendix B</b>	
<b>Pathogens.....</b>	<b>99</b>
Transmission of Pathogens .....	99
Methods for Meeting 40 CFR 503 Pathogen Requirements .....	101
Vector Attraction Reduction (VAR).....	102
<b>Appendix C</b>	
Runoff Management Practices .....	105
Water Management .....	105
Best Management Practices .....	106

---

---

Silt Fence.....	106
Straw Bale Dikes.....	106
Filter Strips.....	106
Berms/Earth Dikes .....	107
Diversions .....	107
Heavy Use Protection .....	107
Natural Resources Conservation Service Regional Conservationists .....	112
<b>Appendix D Nutrient Content of Organic By-Products .....</b>	<b>113</b>
<b>Appendix E Directory of State Regulators.....</b>	<b>117</b>
<b>Appendix F Glossary.....</b>	<b>125</b>
